Subject: RG&E Fiber Update Project

Good Morning –

RG&E is working to enhance the security of our electric system for our customers and employees. To that end, the company is performing necessary work to replace approximately 40 miles of fiber optic cable, used for operational command and control. The company will begin this work on December 11, 2017. RG&E expects completion of this project by spring 2018. Construction in Victor is set to begin early 2018.

It is not anticipated that traffic will be impacted, nor do we foresee a need for detours at this time. RG&E contract crews will be installing overhead and underground fiber optic lines along the roadside in Victor during the course of this project. Work is planned on the following roads:

- High Street
- Gillis Road
- Cline Road
- Victor-Pittsford Road

Please feel free to contact me with any questions or concerns. I can be reached at veronica_dasher@rge.com, or via cell phone at 585.815.3863.

I look forward to working with you.

Kind Regards,

Veronica
